

STATEMENT OF SUBSTANCE OF INTERVIEW

Applicant appreciates the Examiner's participation in a telephonic conference of February 5, 2008. Applicant wishes to thank the Examiner for his time and consideration.

During the interview, the claimed subject matter of the application and the Wee and Sengodan references were discussed. In particular, Applicant presented arguments along the lines of those set forth below in the section entitled "Claim Rejections 35 U.S.C. §103". Specifically, Applicant presented arguments how the Wee and Sengodan references do not teach or suggest features, such as each payload preserved to reconstruct encrypted data stream.

Also discussed during the interview were proposed amendments to the claims. In the interest of expediting prosecution of the application, and without conceding the propriety of the rejection, Applicant proposes to amend the independent claims to further clarify features of Applicant's claimed subject matter.

Applicant understands that the Examiner tentatively agrees that the proposed amendments overcome the outstanding rejections based on Wee and Sengodan references. The Examiner indicates that an updated search would be needed, and requests that the proposed amendments be presented in writing. Applicant submits the amendments in writing in this Response to the Office Action.

Accordingly, Applicant amends the independent claims herein, as discussed during the interview. Applicant submits that all of the pending claims are in condition for allowance.
